

IQOO HACKATHON 2026 · PUNE · HEALTHTECH

YOUR PERSONAL FITNESS COACH. GAMIFIED.

Your body is the controller. Your camera is the referee.
Every rep is **graded before it counts** — and the
grade becomes damage against a boss that fights
back.

THE PROBLEM

EVERY FITNESS APP COUNTS WHAT YOU TELL IT.

Tap ten, it logs ten. Nothing checks whether the rep actually happened — so the numbers climb while the movement quietly falls apart.

WHAT THE APP RECORDS

10 reps

WHAT YOUR BODY DID

4 half reps
Range collapsing by rep 6
Left side compensating

THE INSIGHT

THE SENSOR WAS ALREADY IN YOUR POCKET.

The front camera can see depth, range, tempo and alignment at 30 frames a second. No strap. No console. No subscription hardware.

HOW IT WORKS

THE CAMERA BECOMES THE REFEREE.

WHY IT CHANGES BEHAVIOUR

A SHALLOW REP BUYS ALMOST NOTHING.

Damage is the form score, not the rep count. Cheating the movement cheats only you — the boss simply doesn't take the hit.

THE DIFFERENTIATOR

IT READS **FATIGUE** FROM HOW YOU ACTUALLY MOVE.

Not a difficulty slider. Velocity decay, range collapse and growing pauses — measured against your own opening reps, on the phone, every rep.

FRESH

The boss fights at full strength

FADING

It presses the advantage

GASSED

It staggers — the fight bends to you, and mercy fires when you are done

ARCHITECTURE

THE CAMERA LOOP NEVER LEAVES THE PHONE.

Pose, form scoring and fatigue all run on-device. Frames and landmarks are never uploaded. Training works with the radio off — leaderboards sync later.

TWO PHONES. ONE BOSS. NO SERVER.

Peer-to-peer over local radio. Each phone reports the damage it earned; the boss takes the sum. It works in airplane mode, in a hall with no signal.
